

COMPANY PROFILE:

ABOUT SOFTSYS GLOBAL

Softsys Global provide Research, Consulting, Development, IT and ITes services to clients globally — as partners to conceptualize and realize technology driven business transformation initiatives. With over skilled employees and using a low-risk Global Delivery Model (GDM) to accelerate schedules with a high degree of time and cost predictability. The client is taken care of upon right from understanding clients need, converting the need into technicality, choose the platform of the system, networking the infrastructure, ISO level documentation, QA, implementation of the system Along with all these care would be taken for the client's aptitude, corporate attitude, personality, communication. Our current specialized presence involves addressing all issues connected with website designing, hosting, promotion and maintenance for millions of clients. Through newer, cost-effective and efficient web services we aim to boost up the productivity and potential of individual and institutional consumers globally. Our top-of-the-line BPO services in voice and non-voice realms are benchmarked to enhance businesses of domestic and international clients.

ABOUT SAP

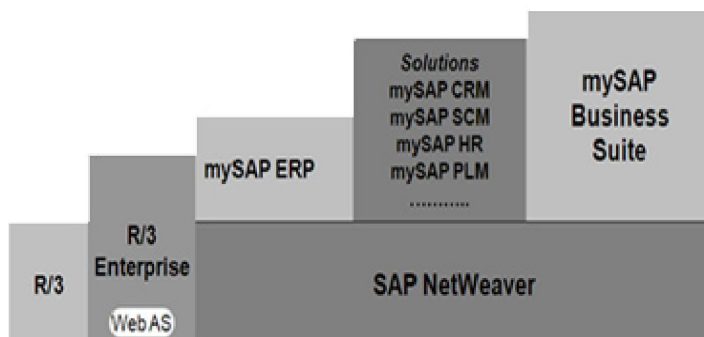

SAP is world's leading provider of business software. Today more than 36,200+ customers in more than 120 countries run SAP application from distinct solution to address the needs of small and mid size enterprises to suit offering for global organizations. Powered by the SAP Netweaver platform to drive innovation and enable business change.

SAP software helps enterprises of all sizes around the world improve CRM, enhance partner collaboration and create efficiencies across their supply chain and business operation.

SAP enterprise systems not just to control cost but to create distinctive capabilities, will establish the basis for competitive differentiation and growth.

Expansion of business in new emerging markets is becoming the buzz word across corporate environment. This exposes the organization to the challenge of harmonizing the existing business processes across geographies while maximizing the benefits of local practices. SAP delivers a global template solution addressing these very needs.

ERP SYSTEM

An ERP system is based on a common database and a modular software design. The common database can allow every department of a business to store and retrieve information in real-time. The information should be reliable, accessible, and easily shared. The modular software design should mean a business can select the modules they need, mix and match modules from different vendors, and add new modules of their own to improve business performance.
